

## Comunidad Creativa

*Eine Gemeinschaft ist die Summe von Initiative und Verantwortung*

This mission statement is already being put into practice by many members.

The underlying purpose of the association is to serve as a platform for people, who

#

do not want to work on solutions to the crisis under the subjective arbitrariness of a company, but through the arduous process of joint decision-making,

#

want to professionalize their approach corresponding to the complexity of the situation by joining forces,

#

want to keep the discourse in connection with collective opinion-forming and decision-making as free as possible from subjective mood swings,

#

and who ultimately contribute to the preservation and further development of the "Paraiso Verde" settlement project through all these attempts

The association, the Asociacion Simple, is roughly equivalent to an e.V. in Germany. The CCA was founded in July 2024 and has set itself the goal of developing a sustainable livelihood for all people living in the Paraiso Verde settlement area. The purpose of the association is set out in the statutes with far-reaching possibilities. It remains to be seen what can be achieved in the future. Active members can be anyone aged 18 or over who owns property in the development and lives in the development area, as well as tenants, family members and partners of property owners who live in the development area.

Passive members can be anyone aged 18 or above who owns property in the settlement but lives outside the settlement area or who still has financial claims on Reljuv (via investment properties, shares, investments, etc.) and thus indirectly fulfills the requirement of property ownership.
